

Antonio Alejandro Badilla Espinoza

Full-Stack Developer | Backend Developer

Chile abadilla2009@gmail.com +56 9 3653 2514 [LinkedIn](#) [GitHub](#)

Professional Summary

Full-Stack Developer with experience in Ruby on Rails, Python, Java, and JavaScript, focused on building scalable applications and backend systems. Strong foundation in object-oriented programming, business logic implementation, and system design. Experience in database migration, platform optimization, and collaborative work in cross-functional teams. Knowledge of Android mobile application development using Android Studio.

Work Experience

Full-Stack Developer | Ziemax Ediciones Ltda.

July 2024 - December 2024

- Designed and executed database migrations, improving system structure and maintainability.
- Optimized platform performance by identifying and resolving bottlenecks.
- Created technical documentation for system updates and code changes.
- Collaborated with cross-functional teams to implement scalable solutions.

Technical Skills

Programming Languages: Python, Java, JavaScript, Ruby.

Frameworks and Technologies: Ruby on Rails, Vue.js, HTML5, CSS3.

Mobile Development: Android development, Android Studio.

Databases: PostgreSQL, Oracle PL/SQL.

Tools and Platforms: Git, Docker, Linux.

Projects

Business Management System (Java)

github.com/DarkYusu/AE4_-_ABPRO1_-_Antonio_Badilla

Business management application built with object-oriented programming, modular architecture, and maintainable business logic.

Risk Prevention Management System (Java)

github.com/DarkYusu/PrevencionRiesgosEmpresa

System based on encapsulation, inheritance, and scalable components for managing risk prevention processes.

SpringEduManager (Java)

github.com/DarkYusu/Proyecto-Modulo-6_Evaluacion

Academic management system with Spring Boot, Spring Security, Thymeleaf, JPA persistence, and a REST API for courses and students.

Biblioteca Digital UNTEC (Java EE)

github.com/DarkYusu/BibliotecaUNTEC

MVC web application for managing books, catalogs, and inventory with JSP, JDBC, and MySQL.

SmartTask (Java)

github.com/DarkYusu/cl.js.smarttask

Console task manager built with Maven, automated tests, and features for creating, completing, and deleting tasks.

Rocola Application (Kotlin/Android)

github.com/DarkYusu/AplicacionRocola_ProyectoFinal

Android application with music recommendations, shared playlists, YouTube Data API, and Firebase services.

Education and Certifications

- Android Mobile Application Development Trainee - Universidad Andrés Bello (March-August 2025).
- Full-Stack Python Development - Desafío Latam (2024).
- Ruby on Rails for Startups - Desafío Latam (2023).
- Java Programming - Alura Latam (January-February 2023).
- Front-End Development - Alura Latam (October 2022-January 2023).
- Programming Fundamentals - Alura Latam (June-September 2022).
- Higher Technical Degree in Gastronomy - CFT Santo Tomás (2016).
- **Java and Front-End Certification** - Alura Latam (2023).
- Full-Stack Python Developer Certification - Talento Digital (2024).

- Google IT Support Certificate - Coursera (2023).
